

Security Operations Centre

(SOC) for IT and OT

Airbus CyberSecurity delivers agile, resilient and trusted cyber security in an increasingly digitalised and connected world

Securing critical business

Organisations, industries and critical national infrastructure are becoming increasingly interconnected - with many processes now relying on digital technologies and real-time data exchange.

This digital transformation has coincided with a rise in sophisticated cyber attacks - and whether the intention is distortion, the theft of strategic data or operational damage; the severe economic and societal repercussions have never been greater.

To mitigate and manage these risks, the implementation of sustainable cyber resilience and effective counter measures is a must. At the same time, the intricate complexities of each organisation’s unique systems require adaptable solutions and processes, implemented by cyber experts.

Value-added SOC services

Airbus CyberSecurity’s SOC’s operate 24/7, 365 days a year; and are run by a team of cyber experts with extensive experience in both fully outsourced and hybrid service models.

Our teams follow a comprehensive “continuous maturity improvement” process that helps to keep cyber resilience up-to-date and in line with the cyber threats of tomorrow. We deliver protective security monitoring for IT, OT and moving platforms to the government, defence, aeronautics, energy, transport, manufacturing and finance industries.

Airbus CyberSecurity is a trusted European security provider with proven experience in safety and security.

Our SOC Services help customers to:

- ▶ **Manage cyber risks**
- ▶ **Comply with regulations**
- ▶ **Improve operational efficiency**
- ▶ **Build and maintain trust in your business**

Our Managed SOC Services

End-to-end from design to service

We can either design, build and run a new SOC tailored to your infrastructure, or alternatively optimise your existing SOC to enhance your security posture.

Lifetime service delivery

We work with you in partnership to constantly update and optimise the SOC service to meet your specific needs and advancing threats.

Full environment coverage

Our SOC services can cover your entire enterprise - from IT to OT and cloud services - providing a complete overview of your security posture. Services can be provided from either Airbus' European premises or your own site.

Incident response and recovery

In the event of a serious attack, we can provide CSIRT (Computer Security Incident Response Team) experts to undertake forensic analysis and support remediation activities.

Advanced use case factory

We quickly address our customer's risks with immediate implementation of the best use cases from the continuously-updated use case factory.

Cyber-on-Demand

For security needs that evolve over time, we offer a flexible framework contract that delivers cyber security services as and when they are needed.

Advanced threat hunting

We apply the very latest global threat intelligence from a range of open and closed sources, in order to detect the most advanced attacks - including those that target your specific environment.

Consulting & Professional Services

We can help you to build the basis for a SOC project or for continuous improvements to your cyber resilience. Our experts have a proven track record of delivering security within both the public and private sectors.

Why Airbus CyberSecurity?

- ▶ 24/7 assistance, 365 days a year
- ▶ Comprehensive support from more than 900 specialists
- ▶ Unparalleled SOC proficiency, with long term experience in safety, security and working with sensitive data
- ▶ Proven security monitoring expertise for critical assets in IT and OT environments
- ▶ Efficient development for customer-specific SOC rules with our use case factory
