A Tactical and mobile SOC solution for advanced cyber defence

- Detect, investigate and react to cyber-attacks
- Ergonomic and modular design
- Improves the robustness and durability of systems
Tactical SOC platform solution

- Deployed on theatres of operations and on national and international operational exercises
- Contributes to the protection of information networks and defence systems against cyber-attacks
- Offers detection, alert and reaction capabilities against cyber-attacks, which are ensured by a unified supervision and investigation system
- Airbus Defence and Space Cyber assists in the implementation of monitoring strategies in relation to threat awareness

Capabilities: Performance and security

- Detection and investigation capabilities via the analysis of supervised system logs and sensors
- Advanced network decryption, detection and investigation via probes
- Extraction and analysis of files via Airbus Defence and Space Cyber's Orion Malware tool
- Centralised supervision with presentation and prioritisation of incidents via a business view
- Orchestration of incident response plans through Airbus Defence and Space Cyber's Cymerius® solution
- Strong and unique authentication of the system via Airbus Defence and Space Cyber's CymID solution
- Integration of threat intelligence and search for IoCs

Ease of use and modularity

- Mobile caisson design for an easy deployment in theatres of operations or exercises
- Significant modularity potential, offering the option of forming a SOC according to specific layouts, environments and location of capture points
- Secure remote access to facilitate multi-site operations

Robustness and durability of solutions

- Third generation Tactical SOC system provided to the Forces
- Training courses and exercises enable customers to take ownership of the system
- Support for deployment and supervision
- Hotline and MCO/MCS
- Tap into Airbus Defence and Space Cyber expertise as an architect and integrator of portable SOC and SOC-secure systems
- Several contracts signed with the French DGA in the field of LID cyber defence with a first contract in late 2011

Airbus Defence and Space Cyber

A leading European provider protecting EU institutions
An end-to-end integrator for IT and OT industrial cyber security
A trusted partner for Airbus, Governments and Critical Industries
Unique experience with platform security and embedded systems
Airbus Defence and Space Cyber: A proven industrial partner for designing defence solutions from end-to-end

- Design of a full cyber security architecture for tailored solutions, support for certification process
- Risk analysis taking into account specific military requirement
- Development of new security policies in accordance with military standards
- Experience working with defence in the UK, France and Germany

Airbus Defence and Space Cyber: The architect and integrator for all your cyber defence needs

- Secure architecture design and certification
- Build, develop and integrate custom solutions
- Validate system security
- Maintain both operational and security conditions
